### **HOMEWOOD PRESS TAKES GREEN INITIATIVES TO A HIGHER LEVEL WITH NEW WIND TURBINE**

*Toledo printer helps area businesses meet green goals and requirements.*

Toledo, OH – For Homewood Press, installing a new wind turbine is more than just a way to produce their own electricity, it's another example of the company's ongoing commitment to the environment.

In November 2008, Homewood Press will break ground for the installation of a commercial wind turbine in their own backyard at 400 East Stateline Rd. Tapping into the wind's power with a 60-foot tall Skystream generator, the unit will connect directly to the power grid and provide a portion of the electrical needs for Homewood Press's new, energy efficient facility.

Going green is not a new concept at Homewood Press. Over the past seven years, the Toledo-based printer has focused on doing its part to protect the environment and conserve resources. In addition to recycling paper and inks, the company offers green printing alternatives and participates in several sustainable forestry initiatives. In fact, Homewood Press is the only area printer to receive certification from the Forest Stewardship Council (FSC), the Sustainable Forestry Initiative (SFI), The Programme for the Endorsement of Forest Certification (PEFC) and the Sustainable Green Printing Partnership (SGPP).

"Our commitment to the environment enables us to be a part of our customers' green initiatives, too," explains Mark Dubuc, CFO of Homewood Press. "We set out to find ways to reduce our environmental footprint. And through these efforts, we have become smarter, leaner and more resourceful in the way we work. So, we're able to provide many environmentally friendly options when it comes to our customers' printing needs."

Homewood Press is a full-service commercial printing company serving area businesses for more than 70 years. With multi-color presses and finishing processes, the company offers the capabilities to print materials ranging from brochures and annual reports to catalogs and packaging. For more information, contact Scott Dubuc at 419-478-0695 or visit [homewoodpress.com](http://homewoodpress.com).
